**Subject:** RE: DEQ Rhone Poulenc Review Letters- FS Work Plan and GW Monitoring Plan

Hi Eva –

I talked with Joan Underwood - who represents Rhone-Poulenc - this morning regarding the specificity of the GW monitoring discussion we'll have with them next Friday. First, we discussed our expectation that the groundwater monitoring plan will address both DEQ and EPA comments that we provided RP last Friday. More generally, I also said that we would like to see some presentation regarding DQOs for their plan, which could be generalized to address data gaps on certain portions of the site for initial discussion of potential remedial options. I told her that we certainly did not expect a full response/discussion regarding to our comments provided to RP last week. According to her e-mail invite she said "We will discuss the goal of this initial sampling and how the wells for sampling were chosen based on DEQ RI addendum comments and the goal of this initial sampling so it will be helpful if everyone can log in to view maps or tables we may review."

I expect that RP will elaborate some regarding the value of collecting groundwater data ASAP, and perhaps suggest that the results of that sampling may affect future long term sampling needs for the site. Joan also mentioned that RP is anxious to start interim remedial actions ASAP, and not wait for a more comprehensive decision-making procedure to determine a final remedy of a combination of remedies for the site. Perhaps that is, in-part the basis of RPs request to sample now, we'll find out more about that next Friday.

Regarding review docs, etc., Joan said that she would have something for us to review next Thursday – she's thinking an agenda with figures and tables. So, sounds to me that this will be more of a 1000 foot meeting but it's worthwhile to hear what RP is thinking now considering they have a full perspective of DEQ position and expectations based on our comments to the GW monitoring plan, the Off-property HHRA, and the FS WP.

Please let me know if you have any questions or suggestions to make next week meeting more valuable.

Thanks, and have a nice weekend.

Scott

Thanks, Dave. Mike Allen and Howard Young will be able to attend the RP meeting on the 20<sup>th</sup>. I was wondering if you could ask RP if there's an agenda, presentation, and what their expectations are for the meeting so we could better prepare? Thanks.

Eva,  
Attached are DEQ's comment on the GW Monitoring Plan. We have not had any specific conversation with StarLink about our comments or CDMs sediment cap modeling work.  
Dave

Eva,  
Attached are DEQ review letters on the Rhone Poulenc Feasibility Work Plan and Groundwater Monitoring Work Plan.
